SOME EXAMPLES OF HOW OUR *IN-HOUSE DENTAL BENEFIT PLAN* CAN WORK FOR YOU and/or YOUR FAMILY.

A patient who maintains a standard 6-month cleaning/exam cycle with regular annual bite-wing x-rays i.e.; ADA standard for preventive care, would pay \$395 in this office (and most others) for these services.

A Plan participant would pay a \$299 annual fee and the above services would be performed FREE of charge.

A single plan participant paying the \$299 annual fee would **immediately save \$96 for his/her annual preventive care.**

A couple's savings would be \$293, more than half the annual cost.

Immediate savings for a family of four can be as much as \$400.

Let's look at three other examples:

1. An average white filling costs about \$300 (we only do white). A plan participant would **receive a 25% or \$75 savings.**
2. An average root canal in this office costs \$1,200. A plan participant would receive a **25% or \$300 savings.**
3. The fee for a single crown is \$1,425. A plan participant would receive a **25% or \$356.25 savings.**

For those services that are not covered at the 25% discount we may offer special pricing. Ask for details on your particular needs.
